Now With Voice Dictation Don't Type Just Talk!

Why Use Professional Telecom Audio?

Every company wants to get the best return on the investment they have made in their phone system. Handling calls efficiently should be coupled with giving the best audio impression to callers. Badly self-recorded routing or on-hold announcements can affect your business image. Our Professional Telecom Audio creation service is cost-effective and easy to use making Professional Announcements a no-brainer for every business.

Hold Time Is Gold Time

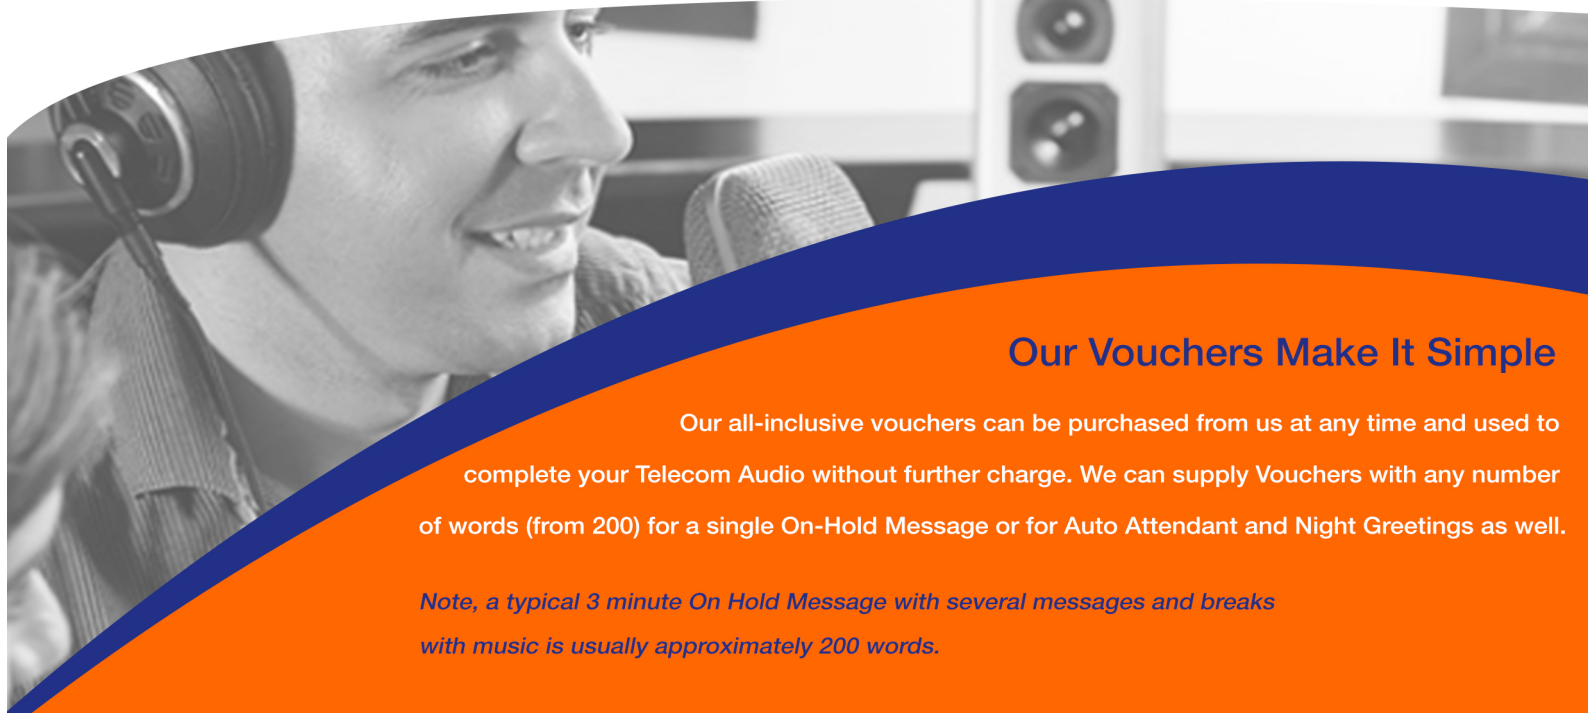

When your callers are waiting on hold they're a captive audience. Playing them silence or plain music is wasting an opportunity to tell them more about your business. Information on hold can include new products or services, web site details, special offers, opening times, recent awards etc. Studies have shown that information on hold makes the wait time much easier and stops callers hanging up so Professional Telecom Audio is in everyones best interest!

Popular Types Of Telecom Audio

 <p>On Hold</p>	<p>Music & Messages played to your callers while on hold.</p>	<p>Several messages over a 2-3 minute period thanking callers for holding and giving useful customer information.</p>
 <p>Auto Attendant</p>	<p>Answers your phone lines and gives routing options for callers ('For Sales Press 1')</p>	<p>Example : 'Thanks for calling ABC, For Sales Press 1, For Accounts Press 2 etc.</p>
 <p>Night/Closed Greeting</p>	<p>Played to callers out of hours/when you are closed</p>	<p>Example : Thanks for calling ABC, we're sorry we are closed, were-open at... please leave a message.</p>

Our Audio services don't stop there, you can use us to generate Audio for IVR (interactive Voice Response) or your web site/promotional video's and have a consistent sound across all of your communications.

Our Vouchers Make It Simple

Our all-inclusive vouchers can be purchased from us at any time and used to complete your Telecom Audio without further charge. We can supply Vouchers with any number of words (from 200) for a single On-Hold Message or for Auto Attendant and Night Greetings as well.

Note, a typical 3 minute On Hold Message with several messages and breaks with music is usually approximately 200 words.

Here's How Easy It Is To Create & Order An Announcement
